

profootballsidedkick.com NFL 2024 OVERACHIEVE/UNDERACHIEVE TEAM PREDICTIONS

METHODOLOGY:

1. One Score Games Prior Year: Mathematical probability indicates high amounts of one score game wins or losses in a season are not likely to repeat from one year to the next year and should revert to the median.

2. Fumbles Recovered/Lost Prior Year: Fumbles are highly a result of chance and bad luck more than any particular skill or lack of skill and not likely to repeat from one season to the next. Thus, teams with high fumbles lost differentials one year should revert to the median the next.

3. Our Formula: We conclude a combination of the two factors combined results in over and undervalued teams inverting prior year one score victories and team fumbles lost/gained. Below in green are undervalued teams to bet OVER their wins total and those in red are overvalued teams to bet UNDER when betting wins totals and team finish exotics in your pre-season bets.

HISTORIC RECORD:

All-Time: 16 wins, 13 losses... 55.2%... plus 1.65 units
