MOCK DRAFT EVALUATION POINTS AWARDED CRITERIA

ROUND 1 CORRECT PICKS SCORING

Intent: Reward analysts for each pick that is correctly selected as a first round pick.

Scoring Method: 1 point for each correct first round selection (maximum points is 32).

CORRECT PLAYER/POSITION TO CORRECT TEAM

Intent: Reward analysts for player and/or position to correct team regardless of pick # taken. Accounts for trades to a different pick # and rewards analysts for team needs analysis.

Scoring Method: 2 points for correct player to team, 1 point for correct position drafted to team.

CORRECT PLAYER/POSITION TO CORRECT PICK

Intent: Reward analysts for situations where trades wreck their board regarding exact player to right team. It allows reward for analyzing a certain player will go at a certain point based on talent regardless of the team picking him.

Scoring Method: 2 points for correct player to correct pick #, 1 point for correct position to pick #.

CORRECT PLAYER/POSITION TO CORRECT TEAM/PICK # LIMITATION

Intent/Scoring: So scoring for right player and pick # scoring doesn't get out of hand we limit any pick to three points excluding 1 point for first round category.

MULTIPLE POSITION HYBRID PLAYERS

Background: Today's NFL has players lining up at multiple positions and draft experts changing a player's position for the NFL.

Intent: Level the playing field for hybrid pick scoring so it is fair.

Scoring: Positions considered the same position for scoring: OLB/ILB/DE/DT, SS/FS, G/OT. Center & Guard considered the same only if a major publication mentions a player plays both. Disputes-PFF.

TEAMS WITH MULTIPLE PICKS SCORING

Intent: When teams have multiple picks close together we don't want to score an analyst zero if they reverse the picks as their analysis was generally very good. This applies even if picks are far apart.

Scoring: The multiple picks are interchangeable with a maximum of 3 points per pick awarded.
